

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. ## TO THE TEACHERS OF THE CHILDREN.

---

It is of the utmost importance that the earliest steps in reading should be taken in the right direction. The habit of throwing expression into the sentences from the very first is invaluable; and this is impossible where the vocabulary is large. With this fact in mind, the lessons have been made as simple as possible; the average number of new words being about two and one-quarter to each page.

“To let the new life in, we know  
Desire must open the portal.”

The subjects of the lessons have been chosen with an especial view to interesting the little ones so that their expression will come naturally and spontaneously.

The wise teacher will weave an interest about the earliest lessons, filling them with thought and meaning of which the printed text shall be but a suggestion. A question here and there, a drawing out of the memory and imagination, will fill the pupil with a real interest in what he is reading; and the eager child nature will exult in the knowledge he has acquired, and pressing forward to what lies beyond will throw life and meaning into the simplest sentences.

pretty?

I must take out my sled.

Did baby ever see the snow,  
mamma?

I think so; but she was too little  
to look at it.

I must show it to her.

Baby dear, come here!

What do you see?

I see pretty white feathers.

No, baby, it is snow.

I will take you out in my sled.

There, baby, catch some snow.

Oh, the pretty snow! I want  
some for mamma.

No, baby, you can't take it to  
mamma.

I will give you a ride on my sled.

Isn't this fun? The snow is cold.

Are you cold, baby? Oh no!

We will go to see grandma.

We will show her the pretty  
snow.

You can tell her you saw the  
feathers come flying down.

## GUIDE TO PRONUNCIATION.

A key to the symbols most of which are used in this Reader to indicate the pronunciation of the more difficult words.
